Address: 45, Panchvati Row House, Yogichowk, Surat

Professional Summary

Highly skilled Laravel and Vue.js Developer with 3 years of experience in full-stack web application development. Expert in building responsive and scalable Single Page Applications (SPAs) using Laravel, Vue.js, Inertia.js, and Tailwind CSS. Proficient in third-party API integrations, automation workflows, and real-time communication tools including WhatsApp, ChatGPT, and Google Calendar. Strong backend architecture understanding, clean UI implementation, and a proven record of delivering business-critical projects on time. Experienced in both collaborative team settings and independent freelance projects, with excellent communication and problem-solving abilities.

Key Skills

Laravel, Vue.js, Inertia.js, PHP, JavaScript, jQuery, HTML, CSS, Tailwind CSS, Bootstrap, Laravel Nova, MySQL, Git, REST APIs, ChatGPT API, WhatsApp API, Google Calendar API, SSH, Ploi

Project Highlights

Recency CRM:

Architected and developed a custom CRM application integrating ChatGPT and WhatsApp APIs for real-time customer communication. Implemented automation workflows to sync user actions with Google Calendar. Focused on building seamless user experiences using Vue.js and Inertia.js with robust Laravel backend logic.

EVSpare:

Led the end-to-end development of an automotive parts e-commerce platform. Integrated Stripe for secure payments, advanced VIN-based search filters, bulk Excel product imports, and a custom-built admin dashboard for stock management and order control.

Talent UAE:

Engineered a finance management system for client-side accounting. Built modules for expense tracking, reconciliation, and dynamic reporting. Utilized Vue.js for reactive front-end interfaces and Laravel for scheduled task automation using cron jobs.

Nquiree:

Enhanced an existing e-commerce system with a feature-rich front end including testimonials, product tabs, and dynamic content pages. Integrated Zoho CRM and chatbot, redesigned the checkout and invoice workflows, and implemented a fully responsive design using Tailwind CSS.

PPAY – Project Pay:

Designed a subcontractor payment tracking module with features for managing claims, variations, due dates, bank info, and ledger entries. Built using modular Laravel architecture and integrated Vue.js components for live data interaction.

Professional Experience

PlanicsDev Infotech (1 Year 8 Months) – planicsdev@gmail.com

AR Team Software Solutions (1 Year) – hello@arteamsoftware.com

Freelancing – Built multiple CRM systems with leave management, payroll, and automated reporting for small businesses.

Education

Bachelor of Computer Application, Veer Narmad South Gujarat University, 2020–2023

Career Objective

To leverage my expertise in Laravel and Vue.js to contribute to forward-thinking teams and deliver innovative solutions. I aim to continuously grow as a developer while working on challenging projects that require clean, scalable, and maintainable code.
